Answer the following questions. Each question will be graded from 0 - 4 and the overall score scaled to the maximum number of points. **Print only -- no cursive -- and use a pencil.**

You are only eligible to turn this assignment in if you attended class on February 14 or February 15 and were present for the lecture on metacognition. If you need a reference, check the slides link on the course website.

1. What are the goals of using metacognitive techniques?

2. What level of Bloom's taxonomy do you think you needed to be at in high school to be successful and why?

3. What level of Bloom's taxonomy do you think you need to be at in college to be successful and why?

4. Research the term cognitive bias. Considering your answers to questions 2 and 3, explain how a cognitive bias leads most students to do worse in college than in high school.

5. What specific metacognitive technique(s) will you commit to using to improve your results?
